

# **Defence in case of the inactivity of administrative authority**

Marcel Peter

**Abstract:** The subject of this work is the protection against judicial system inactivity. Inactivity of the administrative body or delays in court proceeding in front of the administrative body are both problems that occur relatively frequently. These problems have frequently negative impacts such as economic and personal on parties that are involved in judicial proceeding because subjects who are being resolved are personal, professional and material in nature. Therefore, more attention is needed to protect an individual against judicial inactivity.

**Keywords:** Administrative regulations, court protection, rule of law, public law,
